EXPERIENCE

This is the link to my portfolio : <https://nickjardinecv.herokuapp.com/>

Please see below a short description of the projects therein.

2021

Web app development

I have worked as a freelance web developer. I have added new templates to the list of services I offer.

2020

Web app development

From May until December, I worked as a freelance web developer and created a number of mobile-first web apps. These projects are done on my side and are with each of the owners for their decision on next steps, e.g. acquiring domain names and paying for hosting. Please see below a short description of each.

Pictor – A mobile first web-app aimed at simplifying the auditioning process for both production Companies and aspiring actors and actresses.

Reference: Kayla Ahmed (072 583 8901)

Raiders-rugby Covid screening – A web app designed for the purpose of collecting and managing information regarding covid symptoms displayed by members of the rugby club on any given day. Admin users have access to the records of all the players in the club allowing for easier management and contact tracing in the event of an outbreak.

Reference: Derek Jardine (076 802 0542)

Bow-tie Realty - A mobile first real estate website for a company operating in Johannesburg South. It is a standard website with the option to create listings.

Reference: Arlene Lapan (060 564 0995)

(Not included in the portfolio)

proof of concept: <http://bow-tie-realty.herokuapp.com/>

Currently developing

Smart Multi Skills Hub – A website for a registered NPO. The site provides information about the NPO and its mission (Empowerment through education of Eldorado Park and its surrounding areas), as well as providing free relevant educational resources for all those interested.

(Not included in the portfolio)

Reference: Arlene Lapan (060 564 0995)

2019

Web app development

During my 9 weeks at Le Wagon, I was a part of 2 group projects in which we developed and launched web applications.

Couch Beef – This was our keystone mobile first web app that functions as an online platform that allows users to wager and win money in real time. Users of the site agree on a price and play against each other in various E-games on a winner takes all basis (Fifa-20 , Call of duty etc.)

(Not included in the portfolio)

Proof of Concept: <http://www.couchbeef.com/home>
